OBJECTIVE

Extremely motivated individual seeking employment within software/game development. I am currently a self-taught coder but am attending a full stack development program through UNCC to deepen my knowledge and reinforce programming fundamentals. I am creative and able to effectively solve problems and propose solutions. I am a dedicated and fast learner who values taking on new experiences and sharpening my skills.

RELATED PROJECTS

The following are projects that I designed and orchestrated from start to finish:

- Retro City – comprehensive database of Retro games featuring general information such as ratings, screenshots, and descriptions: all in a minimalistic and vibrantly stylized shell.
- Bot.RS – simple webapp designed to offer automation to repetitive farming tasks in Old School Runescape. Currently featured are 3 unique bots which perform Woodcutting, Mining, and Fishing at predesignated locations.

EXPERIENCE

[08/2018] – [Present]

[Medical Assistant] • [Piedmont Plastic Surgery] • [Charlotte, NC]

Scribed and charted patient visits and pertinent history in an electronic medical records system. Took patient vitals and answered questions regarding treatment. Worked with insurance companies and pharmacies to ensure proper prescription coverage.

[08/2016] – [05/2019]

[Operating Room Assistant] • [Atrium Health] • [Pineville, NC]

Performed terminal room sterilization in accordance with OSHA standards, standard precautions, and departmental policy. Assisted with positioning and prepping patients. Transferred and transported patients perioperatively. Cleaned equipment and return it to proper storage areas.

EDUCATION

University of North Carolina -
Charlotte

BS- Psychology, Minor in
Religious Studies (2016)

Full Stack Development
Bootcamp (2020)

TECHNOLOGIES

- HTML/CSS
- BOOTSTRAP/FOUNDATION
- GIT
- MYSQL
- JAVASCRIPT/JQUERY
